PROJECT OVERVIEW
Clear Line Construction has been hired to design the SDSU West Campus SURF Laboratory. This facility will be a laboratory for professors, faculty, and students from San Diego State University to treat wastewater in a small-scale environment as part of SDSU’s West Campus expansion in Mission Valley.

Students will be able to learn the process of wastewater treatment and will be able to utilize the reclaimed wastewater for research purposes.

LABORATORY RENDERING

WET UTILITIES
4 pipelines are to be constructed to meet the needs of the facility; domestic water, fire water, a wastewater gravity line leading out of the facility, and lastly a wastewater pipeline that connects to a newly designed lift station that pumps water into the facility for treatment.
