GENERAL CONSTRUCTION NOTES

Curb Ramp Notes

1. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities. The design and construction shall comply with applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

2. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

3. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

4. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

5. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

6. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

7. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

8. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

9. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

10. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

11. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

12. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

13. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

14. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

15. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

16. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

17. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

18. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

19. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

20. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

21. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

22. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

23. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

24. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

25. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

26. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

27. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

28. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

29. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

30. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

31. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

32. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

33. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

34. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

35. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

36. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

37. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

38. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

39. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

40. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

41. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

42. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

43. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

44. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

45. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

46. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

47. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

48. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

49. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

50. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

51. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

52. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

53. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

54. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

55. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

56. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

57. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

58. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

59. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

60. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

61. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

62. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

63. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

64. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

65. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

66. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

67. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

68. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

69. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

70. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

71. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

72. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).

73. The curb ramp shall be designed and constructed to accommodate travel by wheelchair, mobility devices, and other devices that may be needed by persons with disabilities.

74. The curb ramp shall be accessible and usable by all individuals, including those who use wheelchairs or other mobility devices.

75. The curb ramp shall be constructed of materials that are durable, slip-resistant, and safe under all weather conditions.

76. The curb ramp shall be at least 3 feet wide and shall have a gradient no greater than 1:12.

77. The curb ramp shall be marked with tactile paving or other means to indicate its surface texture and provide guidance for individuals with visual impairments.

78. The curb ramp shall be integrated into the overall continuity of the pedestrian path and shall be clearly visible and identifiable.

79. The curb ramp shall be maintained in good condition and shall be repaired or replaced as necessary to ensure its accessibility and safety.

80. The curb ramp shall be designed and constructed to facilitate the safe and convenient use of the area by all individuals, including those who use wheelchairs or other mobility devices.

81. The curb ramp shall be designed and constructed in accordance with the applicable standards and guidelines, including those established by the Americans with Disabilities Act (ADA).
NOTES
1. CURB RAMPS SHALL BE INSTALLED AS SHOWN ON THE PLANS.
2. 6' DISTANCE SHOWN ON PLANS IS MINIMUM.
3. ELEVATIONS SHOWN ON PLANS IS MINIMUM.
4. NO ELEVATIONS SHOWN ON PLANS (TOP OF CURB AND GUTTER ELEV).
5. 1/2" EXPANSION JOINTS.
6. CONSTRUCTION OF ALLEY APRON INCLUDES THE ADJACENT 6' CURB.
7. REFER TO CURB RAMP DETAIL SDG-137.
